

kACARS For All

You will need to download kACARS from our download section. V1.0.1.4 is the standard version, v1.0.1.5 is enhanced for present and future connection abilities. There are no visual or functional differences between the 2.

Note the location where the file is being downloaded (usually in “Downloads”), or save it to your desktop if you have that option.

The downloaded file will be a .zip file. Windows 10 has built-in support for zip files, or you can use a zip extractor such as winzip, winrar, 7zip or other such unzip utility to work with this file.

Working with the zip file

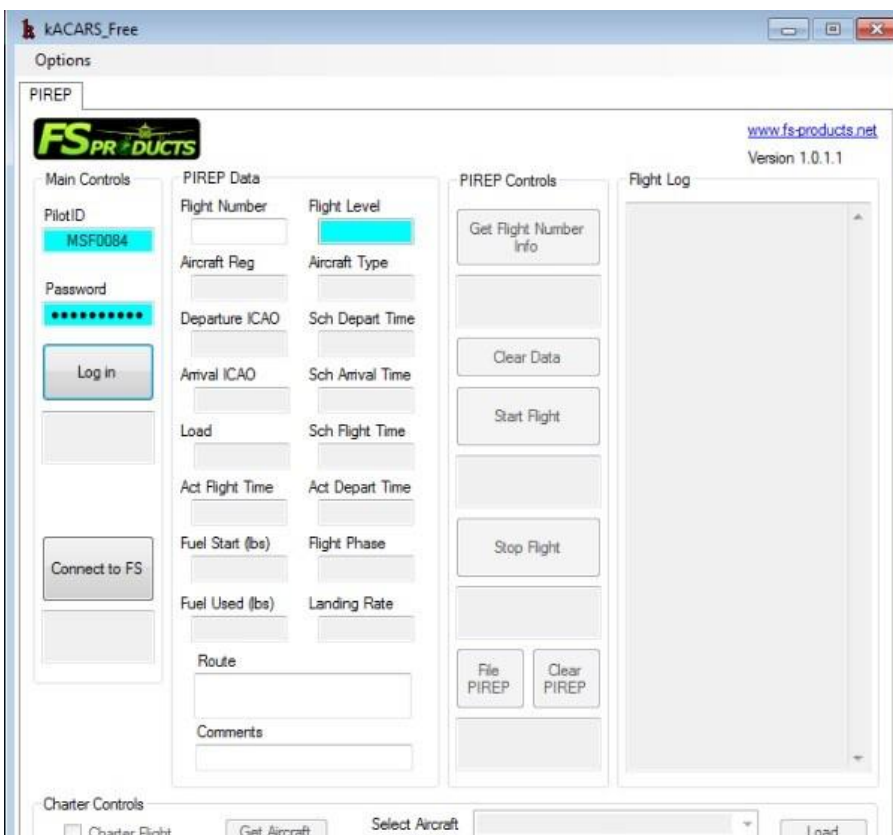

Double click (open) the zip file, it will open. You will see a file inside named **KACARS_Free Setup v1.0.1.4.msi**. This is a Microsoft software installer file.

Double click (open) that file and the installer will start and begin the process of installing kACARS free. It will place an icon on your desktop when it has finished.

This completes the installation. You are free to delete the zip file from your download location, although it is advisable to keep a copy for future reference.

Launch the software by opening the desktop icon

Introducing.....kACARS

Setting up

Out of the box, kACARS, is a rather dumb creature - nothing more than a window on your monitor that knows nothing. We must teach it a few things;

1. Our Airline name
2. How to connect to our Airline
3. Who we are as a pilot
4. Our login credentials

Settings

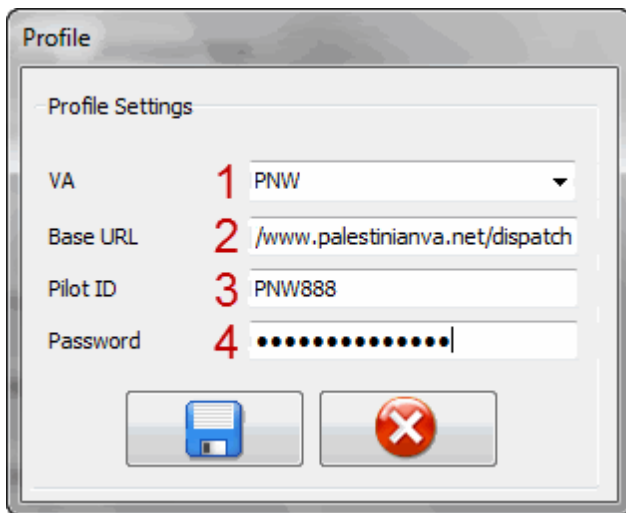

After installing kACARS run it and go to;

Options - 'VA Profiles' and insert the following values:

1. VA - FSNB
2. Base URL - <http://fsnb.ca/Airline>
3. Pilot ID - Enter your pilot ID replacing nnn with your number
4. Password - Enter your password

Click the blue disk icon to Save .

(The image below is a screen capture from a site; ignore the default text)

Profile

Profile Settings

VA 1 PNW

Base URL 2 /www.palestinianva.net/dispatch

Pilot ID 3 PNW888

Password 4

Save Cancel

Now go again to;

Options - 'User Settings' and select the FSNB profile if it's not selected.

Click 'Save' (blue disk icon).

Your kACARS is now ready for use.
